I would like to create the same object in jQuery, so I would like to assign an object to a property of another object. So I have the following object `var exp = { state: "", name: "", city: "", country: "" }` and I want to assign the 2 last properties of the object to the name and country of another object, so it would look like `var exp = { state: "", name: "", city: "",`

country: {name: "", country: ""} } How can I do that? Is it possible? A: Sure: exp.country = { name:

Xforce Keygen 32-bit AutoCAD LT 2019
